

Bitcoin

Liangjie Cao

April 21 2018

Last year , Bitcoin has caused a storm in the world's economic market . What's Bitcoin ? Actually it is digital coin you can send through the Internet . The advantages of Bitcoins are multiple . You can transformed Bitcoins directly to another person without going through a bank or clearinghouse . This means your account cannot be frozen and there are no prerequisites or arbitray limits .

Bitcoins are generated all over the internet by anybody , running a free application called a " Bitcoin Miner " . It's similar to using online bank . Bitcoin is changing finance the same way the web changed publishing . You can purchase video games , gifs , books , service and alpaca socks with Bitcoins .

To be honest , our country hasn't put bitcoin to the economic market . The potential of Bitcoins are enormous . We will get additional bussiness from the Bitcoin economy . ¹
